

Instructions

for DIY Dick Bics! 🍷

You will need:

Bowls for icing - cereal bowls work great, if you have a large group split the icing into smaller bowls once mixed.

Water - a small measuring jug or even milk jug will do!

Tools - I have provided some piping bags for those that want to go pro, but a teaspoon each will work just as well too!

Icing sugar - I have provided enough for you, but it is always handy to have a back up bag in case you add too much water.

How to mix the icing:

Empty the bags of icing sugar into separate bowls. Each bag contains a different coloured powder, so **don't mix them all in together!**

Add a few drops of water and start to mix with a spoon - gently, or it will fly everywhere!

Keep adding water, but just a few drops at a time until you reach a consistency somewhere between toothpaste and shampoo!

Keep stirring until all lumps have gone!

If you aren't too sure about the consistency, take a look at the icing video in my Instagram highlights @riskybiscuitsuk

Get decorating!

Dish out biscuits, sprinkles and icing to your crew, and get creative!

Leave to dry for an hour or so. And don't forget, they are perfect for dunking into a cuppa!
